Subject: Known Public Water Supplies

Reference: Wastewater Disposal Regulations Part II
Standards of Quality for Waters of the State of Utah

Attention: Dan Blake

I. Approved Water Supplies.

A. Gold Hill Water. This water supply is deeded to the town of Gold Hill by C. Woodman. It services only a few families and dwellings. American Consolidated Mining is not responsible for this system but it would be practical to sample this supply as a courtesy, if necessary.

B. Clifton Well Water. This supply provided water for the town of Clifton (approximately 1,700 persons) about the year 1900. The town has long since been abandoned.

C. If other potable water supplies exist on our property, we are not aware of them at this date. If more information becomes available we will forward it.

II. Historical.

A. Historical research should be initiated to determine availability of any sampling data which may also indicate other sources. A teritary review of State records did not indicate any current data. Tooele County records have not been reviewed.

III. Classification.

Determination of the true classification and numerical standards of these sources of water seems advisable. If necessary American Colsolidated Mining will initiate a sampling procedure (Quarterly, Semi-Annually, Annual) and submit them to the state laboratory to establish a current data base. Your recommendations in this matter will be apreciated.
